

Presenting at

 **Intelligent condition monitoring solutions and services**

Martin Briddon, Engineering and Business Development Manager of JF Mimic will be co-presenting with Matteo Conci, Technical Superintendent of d'Amico Tankers on the topic: '**Beyond voyage management**', at the Vessel Performance and Optimisation Forum in Copenhagen on Wednesday 31st October 2018.

The d'Amico Group is a world leader in maritime transportation in the Dry Cargo and Product Tankers sectors. It manages one of the largest fleets worldwide of product tankers, bulk and container vessels. Its mission and strategy have always been to respect and protect the environment, focus on customer care and the professional excellence of its own people.

JF Mimic are providers of intelligent condition monitoring solutions and services, which includes vessel performance and asset efficiency monitoring software, along with data analysis services. Our flagship product, Mimic, provides vessels owners and operators with live decision making data relating to asset condition and operational efficiency.

Data from Mimic can help you optimize your maintenance, improve performance and avoid costs associated with off-hire, breakdown maintenance and insurance claims.

If you are attending the forum do come along to our stand, where we will be pleased to discuss your future vessel performance and asset efficiency monitoring requirements.

For further information on James Fisher Mimic's software, products and services, please visit our website or contact us by email.
