

James Fisher Mimic awarded Cyber Essentials Certification

James Fisher Mimic, providers of Mimic Intelligent Condition Monitoring Software, Asset Performance & Asset Efficiency Software successfully achieves Cyber Essentials Certification.

Cyber Essentials is an industry supported scheme developed by the UK Government to help organisations protect themselves against cyber threats. James Fisher Mimic have been independently assessed by a UK Government approved body, and demonstrated the required systems and controls are in place to guard against cyber threats.

Cyber Essentials Certification allows James Fisher Mimic to continue with its long standing commitment to deliver contracts to the UK Government and provides reassurance to clients and partners around the world that the company is fully committed to protecting against cyber threats.

Mimic Conditioning Monitoring Software is used globally and provides vessel owners and operators with live decision making data relating to asset condition and operational efficiency. Data from Mimic can help optimize maintenance, improve asset performance and avoid costs associated with off-hire, intrusive / breakdown maintenance and insurance claims.
