

Martin Briddon, engineering and business development manager of JF Mimic will be co-presenting with Neil Cook, Technical Director of James Fisher (Shipping Services), on the topic: *'A condition monitoring- based approach for operational efficiency'*, at the Vessel Performance and Optimisation Forum in London, on the 20th June 2018.

JF Mimic are providers of intelligent condition monitoring solutions, which includes vessel efficiency software along with Data Analysis Services. Our flagship product, Mimic, provides vessels owners and operators with live decision making data relating to asset condition and operational efficiency.

Data from Mimic can help you optimize your maintenance, improve performance and avoid costs associated with off-hire, breakdown maintenance and insurance claims.

If you are attending the forum do come along to our stand, where we will be pleased to discuss your future vessel performance and efficiency monitoring requirements.

For further information on James Fisher Mimic's software, products and services, please visit our website our contact us by email.
